

Nine documents. One table. Here is how to read them in an afternoon.

Everything TuanGo has written so far fits on this page, in the order it was meant to be read. Start at the table and go down. Each card tells you the length, the languages it exists in, and who it was written for.

If you have twenty minutes, read 3, then the first three pages of 1, then page 2 of 6. You will know why Romania, what the table is, and what a container does.

If you are deciding whether to build, read 6, 7 and 8 in that order. Plain words first, then the unit economics, then the site that turns them into measurements.

If you are a Chinese partner, start with the Chinese editions of 3 and 1. Documents 4, 5, 6 and 8 carry Chinese titles and names but English text; translations follow once the names are confirmed.

What is inside each one, and when to open it.

#	DOCUMENT	WHAT IT CONTAINS	PAGES	LANGUAGES	FOR WHOM	READ IT WHEN
1	Brand Foundation Book	Why we exist (the EU-China trade gap and the catalogue), the mission and the TuanGo Standard, the name and its two readings, the etymology of three characters, the dragon, the mark, what China intends to lead, the ecosystem of eight branches, how it works, the founders' table, the road, the system and the voice.	13	ZH · RO · EN	Founders' table	First. Everything else refers back to it.
2	Ecosystem Pack	One map of the table with the first two branches named, then two pages each for LONGMAI and PERLA (name, idea, ancestors, arc, identity) and one page on how the two connect and how they differ from TerranOS.	6	EN	Founders' table	After 1, as the bridge to the two books. Written before the books; the books are the current word where they differ.
3	The Table Has Roots	Six dated roots of the Romania-China friendship (1949, 1958, 1970, 1971, 2004-2013, 2021-2025), why it belongs to peoples and not governments, the method it shares with the table, the Chinese side's own words, the UN record.	2	ZH · EN	Founders, Chinese partners	Before any first dinner. The Chinese edition is the one to hand over.
4	PERLA Book	The AI computing branch in seventeen pages: the name 明珠 and its floors, the idea of the pearl, MECIPT-1 and Zu Chongzhi, the four-station arc, the sheet with five layers and a grain, three market pages, the rules, five doors, the money model, identity, ecosystem, roadmap, legal note.	17	EN	Founders' table	When you need the whole compute branch; the legal page before anything is printed.
5	LONGMAI Book	The energy branch in the same seventeen pages: the name 龙脉, the idea of the vein, Li Bing and Anghel Saligny, the arc, the plate with ten lines, the world and Romanian storage market, the rules, five doors, the money model, identity, ecosystem, roadmap, legal note.	17	EN	Founders' table	When you need the whole energy branch; the rules page before a quotation is published.
6	Explained Simply	Two machines in plain words: the AI container (84 chips, 735,840 chip-hours a year, the restaurant rule, EUR 513k in, EUR 310k left) and the battery park (the price gap twice a day, EUR 3.65m, 4.9 years), why they belong on one field, who does what, the words to know and the honest page.	12	EN	Partners, families, banks, first-time readers	Before 7 and 8, always. It is the door through which a non-engineer enters.
7	Container Forecast	One container, two classes: the bill of quantities (EUR 424,500 measured), the margin by sourcing route (90-129% on cost), the owner's forecast in three scenarios, our three income streams, New Generation and the factory-price break-even (USD 388k), buy versus build, from four units to a hundred, method and bounds.	12	EN	Confidential	When a price is discussed. Never outside the founders and the Chinese partners.
8	Campus Proposal	Victor Vlad Delamarina, 7 ha with two HV lines and a transformer: the cadastral sketch, the idea, Phase 1 (4 MW solar, 10 MWh, four containers, EUR 8.7m), the eight parameters to measure, Perla One and Longmai One, the full campus (22 containers, 60 MWh), the TerranOS digital layer, twenty-four months, decisions.	16	EN	Confidential	When a partner asks "where, and what first". Under NDA.
9	SYMBOLON Concept	A fourth room of the circle for later: the thesis, the name 合符 and its old object, the idea, the tally ancestors, the arc, the file, the industry today and how big it can get, the rules in three jurisdictions, where it sits, five doors if ever opened. Listings by TerranOS; nothing operated today.	13	EN	Concept, not a product	Last, and only for the vocabulary. It changes nothing in documents 1 to 8.

Languages: ZH = Chinese edition exists; RO = Romanian edition exists; EN = English. Documents 4, 5, 6 and 8 carry Chinese names and titles in their English text. "Founders' table" means shareable with the seven founders; "Confidential" means numbers that must not leave the founders and the named Chinese partners; "Concept" means a vocabulary proposal, not an offer. Page counts as of 14 October 2026.

Nobody has to read everything. Except the founders.

A CHINESE PARTNER, MEETING US FOR THE FIRST TIME

3 (ZH) → 1 (ZH) → 6 → 8

Roots, then the table, then the machines in plain words, then the site. About ninety minutes. Documents 4 and 5 only if they ask what the names mean.

A ROMANIAN SITE OWNER OR DEVELOPER

1 → 5 → 6 → 8

The table, the energy branch, the plain-words explanation, the campus as a worked example of their own kind of site.

A EUROPEAN BUYER OF A CONTAINER

6 → 7 → 4

Plain words first, then the unit economics with their bounds, then the branch book for the sheet and the rules.

A NEW FOUNDER, TAKING A SEAT

1 → 2 → 3 → 4 → 5 → 6 → 7 → 8 → 9

Everything, in order, in one afternoon. The decisions pages of 4, 5 and 8 are what the seat is asked to decide.

The one rule of the file. Every document carries its own bounds: what is measured, what is estimated, what is a target, and what is only a name waiting for its check. Read the small type at the foot of each page before you quote a number from it. The file was written to be checked, not believed.

WHAT TO TRANSLATE NEXT, IN ORDER

First 6 (Explained Simply) into Chinese: it is the document a partner's colleagues will read. Then 8 (the campus) into Chinese, under NDA, for the factory visit. Then 4 and 5 into Chinese once the names are confirmed by Tim Yang and Andreia Wang. Romanian editions of 6 and 8 for site partners and banks. Document 9 waits.

Two things to know before handing the file to anyone. Document 2 was written before the two books and still says the name conflicts are unverified; the books are the current word. The ecosystem page of document 1 still lists Energy and Compute under generic labels; it will be updated with the names in all three languages once they are confirmed.
